

Dapp Productsheet: 3D-Scanning

PROJECTMANAGEMENT IN FOOD

Improve the factual **insights** into your factory and logistics

Do you want to present your existing and possibly new factory and warehouse with razor-sharp 360° photos and a 3D tour? Do you want to know how a factory can be rearranged? Are you curious about the dimensions of your factory and/or your machinery? 3D scanning is the perfect solution for this. You can "walk" virtually through your factory with the goal you have in mind. The 360° photos/3D scan can be viewed (securely) through your web browser or tablet. No special software is required, and it does not burden your network. In 3D, it is even possible to place interactive tags at positions important to you in the factory or warehouse and provide comments on them. And all of this in high definition. Additionally, Dapp can provide 2D and 3D solutions using the underlying geometry and point cloud, for example, for setting up alternative configurations or creating 2D and 3D drawings.

3D scanning offers solutions if you have the following questions:

- Do you want to **efficiently** share your factory or warehouse with customers, suppliers, or colleagues? You can do that virtually from your computer or presentation screen.
- Do you want to make your internal **communication** more factual by using 3D to zoom in on specific situations in your factory?
- Do you want an **accurate** documentation of certain machines, equipment, or installations to communicate in detail with your suppliers?
- Do you want your drawings translated into **2D drawings**?
- Do you want a **detailed image** of what you want to achieve and be sure of the design?
- Are you planning to build a new factory and want to know what it will look like?
- Do you want to view multiple **scenarios** regarding your future plans?

The benefits at a glance:

- **Accurate** measurements with high precision.
- Significantly **faster** than traditional methods.
- Easy remote communication.
- The ability to visualize **future plans** (in scenarios).
- **Cost and time-saving** compared to manual measuring.

Feel free to contact us and discover what we can do for you and your factory and/or warehouse.
